

About Me

I'm the swiss army knife of full-stack web development, with 14 years of experience programming scalable web applications and specialized knowledge in the field of Computer Science.

Experience

Transitional CTO / Tech Lead

GoPato / On-site & Remote / May 2018 - August 2018

- Short-term contract which tasked me with providing technical leadership and training for all employees in the company, as well as directing all employees in IT departments to attain the company's strategic goals.
- Architected and developed solutions based on React.js, React Native, GraphQL, and PostgreSQL.

Senior React.js Tech Lead

18Techs / Remote / July 2017 - May 2018

- Researched, architected and developed a full-stack cross-platform POS solution for Desktop, Web, and Mobile (iOS) which involves using Electron, React.js, and React Native.
- Set coding standards, style-guides, and document development processes for easy induction of talent into team.

Full-stack Software Engineer

Toptal / Remote / October 2015 - Present

- Develop full-stack React.js solutions for varied freelance projects.

Innovation Wizard and Dev. Commanding Officer

AgilityFeat / Remote / August 2013 - October 2015

- Researched and implemented a walking skeleton of a Ruby on Rails application using Hadoop (HBase) as a data layer.
- Managed small team of remote developers in varied nations and successfully built a walking skeleton of a multi-service application consisting of several isolated modules working seamlessly together.

Senior Creative Engineer

Bosz Digital / On-site / November 2012 - June 2013

- Was an integral part of a team in charge of building an award-winning (Webby) website for Bank of America.
- Key speaker at Digital Zoomit 2013.

Skills

Javascript	MariaDB
ES6 / ES7	PostgreSQL
Node.js	MongoDB
